Division of Pesticides and Environmental Programs

IMPOSITION OF QUARANTINE

In accordance with the provisions of the Formosan Termite Initiative Act, (LA R. S. 3:3391.1 through 3391.13), the Commissioner of Agriculture and Forestry, (Commissioner), by the authority granted to him by La. R. S. 3: 3391.7, hereby issues the following quarantine:

I. FACTS SUPPORTING DECLARATION

On September 24, 2005 Hurricane Rita devastated the parishes of Calcasieu, Cameron and Jefferson Davis. The named parishes are known to be heavily infested with Formosan termites. The hurricane has left millions of tons of wood debris, including debris infested with Formosan termites, in the named parishes. Additionally, thousands of structurally unsound buildings and structures, many of which are infested with Formosan termites, are in the named parishes and will have to be destroyed and turned into wood debris. State and federal authorities have developed plans to turn this wood debris into compost and other items for use in these and other Louisiana parishes. Such use of this wood debris will facilitate the spread of Formosan termites into areas of the state that are either not currently infested or have a minor or moderate infestation, thereby causing destruction or substantial damage to houses and other structures.

Many of the houses and structures that will be destroyed contain architecturally significant components, such as beams and doors, which are both salvageable and economically valuable. These articles will be sold for installation in new and remodeled homes and structures in the named parishes and in other parishes. Many of these articles will be infested with Formosan termites. The use of these infested articles in new and remodeled homes and structures will cause the spread of Formosan termites and subsequent destruction or substantial damage to these and other homes and structures.

The devastation left by Hurricane Rita also requires temporary and permanent housing to be moved into or built in the named parishes. Unless the movable temporary housing is inspected prior to leaving the named parishes, the use or passage of the temporary housing in or through other parishes of the state will cause the spread of Formosan termites and subsequent destruction or substantial damage to these and other homes and structures. All new construction and

reconstruction of permanent housing in the named parishes must be treated for Formosan termites to reduce the extent of infestation and to minimize subsequent destruction and damage to these homes and structures and other homes and structures.

Imposition of this quarantine is required to prevent the spread of Formosan termites and infestation of areas, homes and structures that are not currently infested, or which are to be built or reconstructed. Failure to impose this quarantine will cause severe economic damage and property loss to the citizens of Louisiana.

II. OBJECTIVES OF QUARANTINE

The objectives of this quarantine are to prevent the spread of Formosan termites into areas of the state that are not now currently infested with Formosan termites, to prevent Formosan termites from infesting existing homes and structures that are not currently infested, and to prevent Formosan termites from infesting new and reconstructed homes and structures.

III. GEOGRAPHICAL AREA OF QUARANTINE

The geographical areas of this quarantine are the named parishes of Calcasieu, Cameron and Jefferson Davis.

IV. PROHIBITIONS AND REQUIREMENTS

1. All new construction and reconstruction of houses, buildings and other permanent structures in the named parishes must be treated for Formosan termites according to the Louisiana Structural Pest Control Commission's Rules and Regulations.
2. The movement of any wood or cellulose material from the named parishes and the burial or use as land fill of any wood or cellulose material, including burial or use as land fill in any of the named parishes, is prohibited unless such movement, burial, or use as land fill is performed pursuant to a written plan submitted to and approved in writing by the commissioner or his designee(s). Any changes or amendments to any plan previously approved by the commissioner or his designee(s) must also be submitted to and approved in writing by the commissioner or his designee(s).
3. All temporary housing to be moved out of the named parishes shall not be removed from the named parishes until written authorization is given by the Commissioner or his designee(s).
4. All architectural components, such as beams, doors, and other wood salvaged from a structure in the named parishes shall not be sold or placed in a new, remodeled, or reconstructed

home, building, or permanent structure located in the named parishes or in any other parish prior to being fumigated or treated for Formosan termites.

V. EXEMPTIONS FROM QUARANTINE

The following activities shall be exempt from this quarantine.

1. Commercial logging and timber operations related to silvaculture productions.
2. Commercial operations involving the sale or distribution of nursery stock. Nursery stock is defined in La. R. S. 3:1656(B) and means "all trees, shrubs, ornamental plants, grass sod, foliage plants, or marsh plants."

V. TIME LIMIT

This quarantine shall remain in effect until rescinded by my written order. A waiver of any requirement or authorization for anyone to do any of the prohibited acts, whether in whole or in part, by me or my designee(s) shall not be construed as rescinding or modifying this quarantine.

Signed this 7th day of December, 2005 at Baton Rouge, Louisiana.

BOB ODOM, COMMISSIONER
LOUISIANA DEPARTMENT OF
AGRICULTURE AND FORESTRY

NOTICE:

All plans and changes or amendments to previously approved plans for the movement, burial, or use as land fill of cellulose or wood material as required under this quarantine are to be submitted in writing to:
